

Question:

There are 6 periods in the day for a normal student but John has to take 2 extra classes. Each class is 40 minutes long. He goes to class for 5 days a week. He then spends 1/16 of his weekly minutes each on Saturday and Sunday as extra learning time. How many hours a week does he spend learning?

Reasoning + Answer:

<think>hetakes 2 * 40 = 80 minutes extra classes every day hetakes 80 * 5 = 400 minutes extra classes every week hespends 1 / 16 * 1680 = 105 minutes on saturday and sunday he spends 400 + 105 = 505 minutes learning every week hespends 505 / 60 = 8 . 42 hours learning every week </think><answer>8 . 42 </answer>
