

Question:

Stephen borrowed \$300 from his sister and promised to return it with an additional 2% of the money he owed. For 11 months Stephen will give his sister \$25 per month and the remaining amount, including the interest, will be paid on the twelfth month. How much will Stephen pay in the twelfth month?

Reasoning + Answer:

<think>he owes $300 + 300 * 2 / 100 = 312$ he pays $25 * 11 = 275$ so he pays $312 - 275 = 37$
in the twelfth month </think><answer>37</answer>
