

Question:

Each sleeve of graham crackers makes the base for 8 large smores. There are 3 sleeves in a box. If 9 kids want 2 smores apiece and 6 adults will eat 1 smore apiece, how many boxes of graham crackers will they need?

Reasoning + Answer:

<think>the number of smores is $9 + 6 = 15$ each sleeve makes 8 so they need $15 / 8$
 $= 1.875$ the number of boxes is $1.875 / 3 = 0.625$ </think><answer>0.625
</answer>
