

Question:

Melanie found a blueprint online for a toothpick sculpture she wanted to make. It requires 200 toothpicks. Melanie's mom puts toothpicks in her sandwiches when she serves them for lunch. Melanie started saving them and has saved 10 toothpicks each week for the past 12 weeks. If she continues saving toothpicks at the same rate, how many more weeks will it take her to collect 200 toothpicks?

Reasoning + Answer:

<think>Shesaved 10toothpickseachweekfor 12weekssoshesaved 10x12=120
toothpicks Sheneeds 200toothpicksandshealreadyhave 120toothpickssoshestillneed
200-120=80toothpicks Shesaves 10toothpickseachweekandshestillneed 80
toothpickssoshe need 80 / 10=8moreweeks </think><answer>8</answer>
