

Question:

What are the minimum and maximum possible values of Glasgow Coma Score? Answer Choices: A. Minimum = 3, Maximum = 15 B. Minimum = 0, Maximum = 13 C. Minimum = 0, Maximum = 15 D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> The question is asking for the minimum and maximum possible values of Glasgow Coma Score. To answer this question, we need to identify the correct range of the Glasgow Coma Score. The Glasgow Coma Score is a neurological scale used to measure a patient's level of consciousness. It consists of three components: eye opening, verbal response, and motor response. The minimum possible value of the Glasgow Coma Score is 0, which indicates the worst possible outcome, and the maximum possible value is 15, which indicates the best possible outcome. Therefore, the correct answer is the option that states the minimum value as 0 and the maximum value as 15. </think> <answer> Minimum = 0, Maximum = 15 </answer>
