

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think> First, mehnat finding out base amount of blue fiber, It takes 2 bolts of blue fiber,
And it takes half that much white fiber, So, white fiber = $2 / 2 = 1$ bolt, Total fiber
= blue fiber + white fiber = $2 + 1 = 3$, </think> <answer> 3 </answer>
