

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

<think>she downloads 2 gb / minute. so in 40% of 200 gb = she has . 4 * 200 = << . 4 * 200 = 80
>> 80 gb done so other remains = 200 - 80 = << 200 - 80 = 120 >> 120 gb she can download 2 gb
/min , so for 120 gb it will take her = 120 / 2 = << 120 / 2 = 60 >> 60 minutes but then she starts
interrupted her for 20 minutes. so it will take her 60 + 20 = << 60 + 20 = 80 >> 80 minutes so it will
take her 80 minutes </think><answer>80</answer>
