

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>The total number of eggs laid by the ducks per day is 16 eggs
Janet eats 3 eggs for breakfast every day
So , the remaining eggs after breakfast are 16 - 3 = 13 eggs
She bakes muffins with 4 eggsevery day , so the remaining eggs for sale are 13 - 4 = 9 eggs
Since she sellsthe remaining eggs at \$ 2 per egg , she makes 9 Ã 2 = 18 dollarsevery day at the farmers ' market
</think><answer>18</answer>
