

**Question:**

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

**Reasoning + Answer:**

<think>The initial value of the house is \$ 8 0 , 0 0 0 <br>After putting in \$ 5 0 , 0 0 0 in repairs  
, the total cost becomes 8 0 , 0 0 0 + 5 0 , 0 0 0 = 1 3 0 , 0 0 0 <br>The house's value  
increased by 1 5 0 %, so the increase in value is 1 3 0 , 0 0 0 Ã 1 5 0 % = 1 9 5 , 0 0 0 <br>>So , the new value of the house is 1 3 0 , 0 0 0 + 1 9 5 , 0 0 0 = 3 2 5 , 0 0 0 <br>The  
profit Josh made is the new value minus the total cost , which is 3 2 5 , 0 0 0 - 1 3 0 , 0 0 0 =  
1 9 5 , 0 0 0 <br></think><answer>1 9 5 0 0 0 </answer>
