

Question:

What are the minimum and maximum possible values of Glasgow Coma Score? Answer Choices: A. Minimum = 3, Maximum = 15 B. Minimum = 0, Maximum = 13 C. Minimum = 0, Maximum = 15 D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> The assistant is thinking about the fact that the Glasgow Coma Scale is a neurological scale that is used to assess the level of consciousness in a person. It is a widely used scale that is used to evaluate the severity of head injuries, such as those that may be caused by a car accident. The scale is made up of three components, which are the eye opening, the verbal response, and the motor response. The eye opening component assesses the ability of the person to open their eyes, the verbal response component assesses the ability of the person to respond verbally, and the motor response component assesses the ability of the person to respond physically. The scale is scored on a scale of 0 to 15, with 0 being the worst possible score and 15 being the best possible score. The assistant is also thinking about the fact that the Glasgow Coma Scale is a complex scale that is used to assess a variety of different symptoms, such as confusion, disorientation, and agitation. The scale is often used in a variety of different settings, such as hospitals, clinics, and emergency rooms. The assistant is also thinking about the fact that the Glasgow Coma Scale is a widely used scale that is used to evaluate a variety of different conditions, such as head injuries, strokes, and brain injuries. </think> <answer> C. Minimum = 0, Maximum = 15 </answer>
