

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>He started with 80000, then added 50k so $80000 + 50000 = 130000$. 150% of 130000 is $130000 * 1.5 = 190000$. So he made $190000 - 130000 = 60000$. </think><answer>60000</answer>
