

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>He started with 80000, then added 50k so $80000 + 50000 = 130000$. 130000 is 150% of 80000 so $80000 * .15 = 12000$, so $130000 - 12000 = 118000$. So he made 118000 in profit. </think><answer>118000</answer>
