

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>He started with 80000, then added 50000 so $80000 + 50000 = 130000$. 150% of 130000 is $130000 * .15 = 19000$. So he had $130000 - 19000 = 110000$. So he made 110000 in profit. </think><answer>110000</answer>
