

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>Janet's ducks lay 16 eggs per day. She eats 3 eggs for breakfast, leaving her 16 - 3 = 13 eggs. She bakes 4 muffins that require 4 eggs, leaving her 13 - 4 = 9 eggs to sell. She sells the 9 eggs at 2 dollars per egg. $9 * 2 = 18$. So Janet makes 18 dollars every day at the farmers' market. </think><answer>Janet makes 18 dollars per day. </answer>
