

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>Janet's ducks lay 16 eggs per day. She eats 3 for breakfast. She bakes 4 for friends. So $3 + 4 = 7$ are not sold. $16 - 7 = 9$ are left. She sells each egg for \$2. She makes $9 * \$2 = \18 per day at the farmers' market. So Janet makes \$18 per day. </think><answer>Janet makes \$18 per day. </answer>
