

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>Janet has 16 eggs per day. She eats 3 for breakfast, leaving her with $16 - 3 = 13$ eggs. She bakes 4 muffins with 4 of the eggs, so she's left with $13 - 4 = 9$ eggs. She sells the remaining 9 eggs for \$2 each. $9 \text{ eggs} * \$2 = \18 Janet makes \$18 per day at the farmers' market. </think><answer>Janet makes \$18 per day. </answer>
