

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>Janet starts with 16 eggs. She eats 3 eggs for breakfast each morning. That leaves her with $16 - 3 = 13$ eggs. She sells 4 eggs per day to bake muffins with her friend. That leaves her with $13 - 4 = 9$ eggs to sell at the farmers' market. She sells each egg for \$2. 9 eggs at \$2 per egg is $9 \times 2 = \$18$ per day. So, Janet makes \$18 per day selling eggs at the farmers' market. </think><answer>Janet makes \$18 per day at the farmers' market. </answer>
