

Question:

James decides to pick some blueberries. It cost \$20 to go picking and then another \$1.5 per pound. He picked 30 pounds of blueberries. How much did he save compared to buying at the store for \$2.5 a pound?

Reasoning + Answer:

<think>Hepaid 20+ 1.5*30=20+45=65 Hepaid 2.5*30=75 Hesaved 75-65=
10 </think><answer>10</answer>
