

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think> he runs 3 sprints = $3 * 60 =$ << $3 * 60 = 180$ >> 180 so in one day he runs 180 meters he
ain't do this 7 days a week = $180 * 7 =$ << $180 * 7 = 1260$ >> 1260 so he will run 1260 meters a we
ek </think> <answer> 1260 </answer>
