

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>The total number of eggs laid by Janet's ducks per day is 16
She eats 3 eggs for breakfast every day
So , the remaining eggs after eating are 16 - 3 = 13 eggs
She bakes muffins with 4 eggs every day , so the remaining eggs for sale are 13 - 4 = 9 eggs
>She sells the remainder at the farmers ' market for \$ 2 per egg
So , she makes 9 Ã 2 = 18 dollars every day at the farmers ' market
</think><answer>18</answer>
