

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>The number of eggs laid per day by Janet's ducks is 16 eggs
She eats 3 eggs for breakfast every day, so the remaining eggs after breakfast are $16 - 3 = 13$ eggs
She bakes muffins with 4 eggs every day, so the remaining eggs after making muffins are $13 - 4 = 9$ eggs
Since she sells the remaining eggs at the farmers' market for \$2 per egg, she makes $9 \times 2 = 18$ dollars every day
</think><answer>18</answer>
