

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>The total number of eggs laid by the ducks per day is 16 eggs
Janet eats 3 eggs for breakfast, so the remaining eggs after breakfast are $16 - 3 = 13$ eggs
She bakes muffins with 4 eggs, so the remaining eggs after baking are $13 - 4 = 9$ eggs
She sells the remaining eggs at the farmers' market for \$2 per egg, so she makes $9 \times 2 = 18$ dollars every day
</think><answer>18</answer>
