

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>The total number of eggs laid by Janet's ducks per day is 16 eggs
She eats 3 eggs for breakfast, so the remaining eggs after eating are 16 - 3 = 13 eggs
She bakes muffins with 4 eggs, so the remaining eggs after baking are 13 - 4 = 9 eggs
She sells the remainder at the farmers' market, so she makes 9 dollars
</think><answer>9</answer>>
