

Question:

What are the minimum and maximum possible values of Glasgow Coma Score? Answer Choices: A. Minimum = 3, Maximum = 15 B. Minimum = 0, Maximum = 13 C. Minimum = 0, Maximum = 15 D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> The assistant is thinking about the fact that the Glasgow Coma Score is a neurological scale that is used to measure the level of consciousness in a person. It is a widely used scale that is used to assess the severity of head injuries, such as those caused by car accidents. The scale is made up of three components, which are the eye opening, the verbal response, and the motor response. The assistant is also thinking about the fact that the Glasgow Coma Score is a subjective scale, and the values that are assigned to each component can vary depending on a variety of factors, such as the experience of the person who is administering the test. The assistant is also considering the fact that the Glasgow Coma Score is a complex scale, and it can be difficult to determine the minimum and maximum possible values. </think> <answer> C. Minimum = 0, Maximum = 15 </answer>
