

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>
150% of 80000 is 80000 * 1.5 = 120000. However that's not the actual amount of the house. This simply increases it from an actual example DepthPostBack SERVER ':' severity
