

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>

2 bolts of blue fiber are required

It takes half that much (which is $2 / 2 = 1$ bolt) of white fiber

So total bolts required will be blue + white = $2 + 1 = 3$

</think>

<answer> 3 </answer>
