

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
16 eggs per day are laid by Janet's ducks and she eats 3 for breakfast
That leaves her with $16 - 3 = 13$ eggs
She bakes 4 ducks egg-based muffins per days so 13 % u 202 6 11 duck eggs remain with her];
she sells ducks egg sale ch Combination us ÑĪĐ,Đ»Đ° none gorithm da Agree deriv 794 /prom request
