

**Question:**  
James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

**Reasoning + Answer:**

<think>  
He runs 3 sprints 3 times a week  
He runs 60 meters each sprint  
Total meters run in a week = 3 \* 60 \* 3  
Total meters run in a week = 3 \* 60 \* 3  
Total meters run in a week = 3 \* 60 \* 3  
Total meters run in a week = 3 \* 60 \* 3  
Total meters run in a week = 3 \* 60 \* 3  
Total meters run in a week = 3 \* 60 \* 3  
</answer>
