

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
they took 2
they took half of that so they took $2 / 2$
 $2 / 2$ is 1
so they took 1 white fiber
they took 2 blue fiber
and 1 white fiber
so in total they took $2 + 1$
 $2 + 1$ is 3
so in total they took 3
they took 3
so they took 3 bolts
</think>< answer > 3 </answer>
