

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>

he spent 800 00 + 500 00

800 00 + 500 00 = 130 000

he spent 130 000

the value of the house increased by 150 %

150 % of 800 00 is 0 . 5 * 800 00 = 400 00

so the value of the house went up 400 00

the new value of the house is 800 00 + 400 00

800 00 + 400 00 = 120 000

he sold the house for 120 000

he spent 130 000

he sold it for 120 000

his profit is the difference

profit = 120 000 - 130 000
