

**Question:**

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

**Reasoning + Answer:**

<think>  
original price \$80000  
he added \$50000 on the house  
so the total value Josh then added is  $\$80000 + \$50000 = \$130000$ .  
the value of the house increased by 150% of 80000  
that's  $130000 - 80000 = 50000$ .  
Josh made profit of 50000.  
</think>  
<answer>  
50000 </answer>
