

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
the robe takes 2 bolts of blue fiber
half of that means $2 / 2 = 1$ bolt of white fiber
total number of bolts needed is the sum of blue and white fiber needed
thus , it's $2 + 1 = 3$
</think>
<answer>
3 </answer>
