

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
the total number of eggs laid by ducks in one day is 16
Janet eats 3 eggs for breakfast
so the remaining eggs are $16 - 3 = 13$
Janet bakes muffins for her friends with 4 eggs and then she sells the rest
she sells her extra eggs daily for 2 dollars per egg
the money she makes daily is then the remaining eggs $13 - 4 = 9$ - how many eggs she sells
so the money she makes is $9 * 2 = 18$ dollars per day
</think>
<answer>
18 dollars
</answer>
