

Question:
The feedback loop in men which regulates the production of sex hormones includes all but which of the following?

- Answer Choices:
- A. follicle-stimulating hormone
 - B. oxytocin
 - C. pituitary gland
 - D. hypothalamus
 - E. gonadotropin-releasing hormone
 - F. luteinizing hormone
 - G. testosterone

Reasoning + Answer:

<think> The hypothalamus plays a role in regulating the feedback loop that controls the production of sex hormones. However, Oxytocin is more involved in social and emotional connections rather than being part of the direct feedback loop regulating sex hormone production. </think><answer> B </answer>
