

Question:
Which of the following factors is associated with a decreased risk of Alzheimer's?
Answer Choices:

- A. Being African or Hispanic American
- B. A lower level of education
- C. Living in a city
- D. Being married
- E. Having a family history of Alzheimer's
- F. High intake of saturated fats
- G. Older age
- H. Eating fish
- I. Being a smoker
- J. Drinking alcohol regularly

Reasoning + Answer:

<think>
1 . Identify the key factors associated with Alzheimer's risk
2 . Determine the options that would logically decrease the risk of Alzheimer's
3 . Eliminate options that are generally known to increase the risk
4 . Analyze the relationship between lifestyle factors and Alzheimer's
5 . Recall specific studies and research findings related to Alzheimer's prevention
6 . Use knowledge of demographics and socioeconomic factors
</think><answer> H .
