

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think> At birth, the least developed part of the brain is typically the visual system, which is responsible for processing visual information. However, the brain, thalamus, and other structures are still developing, with the visual system being among the first to mature. The visual system begins to develop in the womb and continues to refine its functions soon after birth, indicating it is among the earliest developed parts of the brain. </think>

<answer>A. visual system</answer>
