

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>
- The brain at birth is not fully developed .
- The cortex , being the last part to develop , is not well developed at birth .
- It controls higher functions and is involved in perception , thought , and action .
- All other parts of the brain are more developed at birth compared to the cortex .

So the least developed part of the brain at birth would be the cortex .

</think>
<answer> G . cortex </answer>
