

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
16 is the number of eggs laid per day .
3 are eaten each morning , so $16 - 3 = 13$ are left after breakfast
Jan et bakes with 4 of these , leaving $13 - 4 = 9$
Each of the 9 ducks are sold for \$ 2 , so $9 * 2 = 18$ in total per day
</think>
< answer >
18 </answer >
