

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

`<think>`
150% of 800 00 is $(150 / 100) * 800\ 00 = 120\ 000$. So now the value of the house is $800\ 00 + 120\ 000 = 200\ 000$
He invested 500 00 in repairs, so his total investment was $800\ 00 + 500\ 00 = 130\ 000$
His profit would be $200\ 000 - 130\ 000 = 700\ 00$
`</think>`
`<answer> 700 00 </answer>`
