

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>
3 sprints 3 times a week is $3 * 3 = 9$ sprints in a week
He runs 60 meters in each sprint
Total meters = 9 sprints * 60 meters = 540 meters
</think>
<answer>
540 meters </answer>
