

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>
he runs $3 * 60$
 $3 * 60 = 180$
so he runs 180 meters per week daycare
he runs 3 times a week $1\frac{1}{2}$
so he runs $180 * 3$
 $180 * 3 = 540$ }></severity hendis
