

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>

Number of bolts of blue fiber needed = 2

Number of bolts of white fiber needed = $2 / 2 = 1$

Total number of bolts needed = 2 (blue) + 1 (white) = 3

</think><answer>

3 </answer>
