

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

Number of sprints per week : $3 * 3 = 9$

Distance per sprint : 60 meters

Total distance per week : $9 * 60 = 540$ meters

</think>

<answer>

540 meters

</answer>
