

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
First , calculate how many eggs are left after Janet eats the 3 she uses for breakfast . With 1 6 eggs laid each day , if Janet has 3 eggs eaten then she has $16 - 3 = 13$ eggs left .
Since she sells the remainder at \$ 2 per egg , her daily income is $13 * 2 = \$26$.
</think>
<answer>
26
</answer>
