

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

Let's break down the problem step by step .

1 . **Calculate the total number of eggs laid by the ducks each day : **

- Janet's ducks lay 16 eggs per day .
- So , the total number of eggs is 16 .

2 . **Subtract the number of eggs Janet eats for breakfast : **

- Janet eats 3 eggs for breakfast every morning .
- So , the number of eggs remaining is $(16 - 3 = 13)$.

3 . **Subtract the number of eggs Janet uses to bake muffins for her friends : **

- Janet bakes muffins with 4 eggs every day .
- So , the number of eggs remaining is $(13 - 4 = 9)$.

4 . **Calculate the revenue from selling the remaining eggs : **

- Janet sells the remaining 9 eggs at the farmers ' market for \$2 per egg .
- So , the revenue is $(9 \times 2 = 18)$.

<think>

- Janet's ducks lay 16 eggs per day .
- She eats 3 eggs for breakfast .
- She uses 4 eggs to bake muffins for her friends .
- Therefore , the number of eggs remaining for selling is $(16 - 3 - 4 = 9)$.
- She sells these 9 eggs for \$2 each .
- So , her daily revenue from the farmers ' market is $(9 \times 2 = 18)$.

</think>

<answer> 18 </answer>
