

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> To find the minimum and maximum possible values of the Glasgow Coma Score (GCS), we consider how the GCS is calculated. The GCS is a neurological scale that assesses the conscious level in a person after a brain injury. It is calculated by adding the scores of three components: eye opening (E, 1 - 4), verbal response (V, 1 - 5), and motor response (M, 1 - 6). The sum of the scores can range from 3 (minimum, indicating deep unconsciousness) to 15 (maximum, indicating clear consciousness) </think><answer> Minimum = 3, Maximum = 15 </answer>
