

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> I need to understand the Glasgow Coma Score (GCS) structure . It's a neurological scale that assesses a patient's conscious level . The GCS is typically measured by adding scores from three components : Eye Opening (E), Motor Response (M), and Verbal Response (V). Each component has a range of possible scores , with the highest score being 4 for Eye Opening , 6 for Motor Response , and 5 for Verbal Response . This means the total GCS can range from 3 (1 + 1 + 1) to 15 (4 + 6 + 5). Now , I should identify the correct minimum and maximum values . </think><answer> A . Minimum = 3 , Maximum = 15 </answer>
