

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think>

- The Glasgow Coma Score (GCS) is used to assess the level of consciousness in a patient .

- It has three components: Eye opening , Verbal response , and Motor response .

- Each component can score between 1 to 4 , 1 to 5 , and 1 to 6 , respectively .

- The lowest possible score would be the sum of the minimums of each component , which is $1 + 1 + 1 = 3$.

- The highest possible score would be the sum of the maximums of each component , which is $4 + 5 + 6 = 15$.

- This indicates the minimum possible value is 3 and the maximum possible value is 15 .

- The score ranges from 3 to 15 .

- Therefore , the correct answer is the one that matches this range .

- The correct option is A , as it states Minimum = 3 , Maximum = 15 .

- Other options are incorrect because they either have wrong minimum or maximum values or don't match the GCS range .

- The correct answer is not D , as it suggests a higher maximum value of 18 .

- The correct answer is A , as it accurately represents the GCS range .

- The question is about the minimum and maximum values , so the answer is not about the meaning or interpretation of the scores .

- The answer should be one of the given options , not a newly created answer .

- The answer is not D , as it has a higher maximum value of 18 .

- The answer is not B , as it has a lower maximum value of 13 .

- The answer is not C , as it has a lower minimum value of 0 .

- The answer is A , as it has the correct minimum and maximum values .

- The answer is A , as it accurately represents the GCS range .

- The answer is A , as it correctly states the minimum and maximum values of the GCS .

- The answer is A , as it correctly represents the GCS range .

- The answer is A , as it correctly states the minimum and maximum values of the GCS .

- The answer is A , as it correctly represents the GCS range .

- The answer is A , as it correctly states the minimum and maximum values of the GCS .

</think><answer>A . Minimum = 3 , Maximum = 15 </answer>
