

Question:

Which of the following factors is associated with a decreased risk of Alzheimer's?

Answer Choices:

- A. Being African or Hispanic American
- B. A lower level of education
- C. Living in a city
- D. Being married
- E. Having a family history of Alzheimer's
- F. High intake of saturated fats
- G. Older age
- H. Eating fish
- I. Being a smoker
- J. Drinking alcohol regularly

Reasoning + Answer:

<think>
reasoning process here
being African or Hispanic American , lower level of education , older age , and family history of Alzheimer's are risk factors , which means being a non -African or non -Hispanic American , higher level of education , not living in a city , not being married , not being older , and not having a family history of Alzheimer's are associated with a decreased risk , and eating fish intake , which is a healthy option , is associated with a decreased risk of Alzheimer's .
