

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think> Okay , if James runs 3 sprints 3 times a week , that's $3 * 3 = 9$ sprints per week . Each sprint is 60 meters , so if he runs 9 sprints per week , he runs $9 * 60 = 540$ meters per week . The total number of meters he runs per week is 540 meters .</think><answer>540</answer>
